vertical blinds

Vertical blinds are the classic, ever stylish window furnishing. The blades emulate soft draperies. Drawn like a curtain they can be rotated to provide light control and privacy in one simple operation. Vertical blades can also be matched to your roller, roman and panel glide selections to give an elegant, unified look in open living spaces.

All of our vertical blinds are beautifully handcrafted, resulting in a far superior product which we believe to be the finest on the market.

Features

There is a stunning versatility to our fabric collection which will add glamour to any interior. We have a vast range of colours and textiles to choose from, including translucent, blockout and jacquard weaves. Your fabric choice can also help protect your environment by taking into account privacy, light, heat and glare.

The curved blades of New Generation vertical blinds give a wonderful draped appearance and provide an economical alternative to this popular style of blind. The sturdy 89mm PVC blades come in a variety of styles, fashionably matched to the most popular fabric range colours. They are durable and low maintenance, with no weights or chains resulting in a far neater appearance.

The unique wand controls are extremely stylish and strong and are the standard operation (preferred for child safety purposes). Alternatively, cord control is also available. A double sided fabric insert on the track matches your drapes, with fabric blades available in two sizes: 127mm or 89mm. Tracks and wands come in 4 popular colours: white, birch white, clear anodised and black.

A choice of made to measure pelmets are also available with matching inserts. Innovative pull-apart carriers make it simple to replace the fabric blades, perfect when changing your interior decor.

We use an aluminium tracking system and stainless steel spacer links which will not rust or corrode.
